

## QM Data Solutions Welcomes the Consortium, RRG Members

Consortium RRG is a Risk Retention Group developed by McNeary Healthcare to meet the medical liability insurance and risk management needs of non-profit hospitals with fewer than 500 licensed beds.

We are pleased to announce the addition of a significant new benefit for Consortium RRG member hospitals.

The Subscriber's Advisory Committee (effectively the RRG Board) voted to approve a plan presented through the Member Services sub-committee to provide QMS™ Risk Management Software to all members who desire to utilize the software.

The availability of the software will not only assist members in hospital wide data collection and reporting, but will aid in data collection for participation in various Consortium Risk Management initiatives such as this year's "Patient's Fall Study".

The inclusion of this software program makes Consortium RRG truly unique in the marketplace. While such user oriented software programs were a hallmark of MMI, Phico and Reciprocal of America, QMS™ is the only major hospital liability risk management software program to survive in the wake of the demise of these insurance companies.

During the months following this approval, many of the Consortium RRG members elected to utilize the system. The list of participants has grown from an original three (3) to eighteen (18) as of the end of October.

For questions about the program or to schedule your installation, please contact a member of your McNeary Healthcare team at (800) 729-4149, Virginia Neal at QM Data Solutions (888) 364-6424, or your Consortium Risk Management Consultant. You can also learn more about QMS™ and its capabilities by visiting [www.qmdata.com](http://www.qmdata.com)

### Welcome NEW QMS™ Users!

Alliance Hospital  
*Odessa, TX*
