Enhancements Coming to QMS™

It gives us great pleasure to share with you the exciting updates/features that are being added to the QMS™ software and will be released in 2006.

The following features/enhancements will be in the next full QMS™ system release:

1. Option to utilize the “web-based online incident reporting” in addition to the current networked or centralized data entry of incidents
2. Auto notification of transactions entered through email/messaging
3. Ability to export the transaction data to MS Excel
4. Enhancement of the Ad Hoc Report Writer and Graphic capabilities
5. Improved Word Processor to include the ability to add tables and images to a document
6. Additional Quality/Risk Assessment, Credentialing, and Claims reports

In addition, the features that will be in the next Core Module release in addition to the changes by JCAHO and CMS include:

1. The ability to run reports to provide you with preliminary numerator/denominator numbers for each measure in each core measure set.
2. Additional fields to identify a primary and secondary physician for each case.

An additional enhancement/feature that will be available will be:

The ability to link your QMS™ software to an HL7 feed. This will give you access to patient information as it is available in the facility’s patient information system.

Thank you for your continued use and support of the QMS™ software.

Please do not hesitate to contact me either by email at VNeal@QMDATA.COM or by phone at 888-364-6424 if you have questions or need additional information.

New Staff Member Joins QM Data Solutions

Roberto Ruzzi
Programmer/Analyst

It is our pleasure to welcome Roberto to the staff of QM Data Solutions. Roberto earned his BS from Pennsylvania State University. He has extensive experience in software programming with Towers Perrin in Philadelphia. He was the Lead Programmer for a team that administered to major clients there.

Welcome NEWEST QMS™ Users!

Caldwell Memorial Hospital
Lenoir, NC

Franklin Medical Center
Winnsboro, LA

West Care Health System
Sylva, NC

Frequently Asked Questions

<p>Question:</p>	<p>QMS™ is running on a network and when I tried to purge the Activity Log, it did not clear. Why?</p>	<p>Answer:</p>	<p>There is someone else using the system. You must have them close QMS™ before you can purge the log.</p>
<p>Question:</p>	<p>In the Core Modules, when I click on a record, I only see one measure set. Why can't I get to all five?</p>	<p>Answer:</p>	<p>When a record is entered, QMS™ verifies which Core Measure Set the patient is part of and that is the ONLY set for which the criteria will appear. (Rarely, a patient may qualify for 2 sets and then both sets of criteria will appear.)</p>

Don't forget to send us suggestions for QMS™ to QMS@QMData.com
